Tips for Animal Matching

1 Wooden Board

6 Animal Tokens

How to introduce:

- Guide your child to match the animals by placing one animal in its corresponding spot on the board.
- Encourage them to imitate your actions.
- Introduce one animal at a time to prevent overwhelming your child. Once they become familiar with one animal, gradually move to the next animal.
- Use simple language to describe each animal as you introduce them. For example, say, "This is a tiger. Tigers roar!" This will help reinforce vocabulary and animal recognition.
- Eliminate distractions such as TV, phone, etc.
- Repeat the activity multiple times to reinforce the learning. Make it a part of your child's routine.
- Celebrate their efforts by praising or clapping for them.
- Remember that learning takes time, especially for young children. Be patient and supportive as your child develops their understanding of shapes.

Ways to play:

- Scan the QR code to introduce animal sounds to your child. Make the sounds yourself and encourage your child to mimic you.
- Use the QR code to play animal sounds and have your child identify which animal is making each sound.
