Tips for Sound Flashcards

How to introduce:

- Gain confidence by practicing with the flashcards in front of a mirror before showing them to your child.
- Eliminate distractions by sitting away from the TV, Phone, etc.
- Introduce one card at a time to avoid overwhelming your child. Let them get familiar with each card before adding new ones.
- Hold flashcards at least 40-50 cm away from your child's eye level.
- Read aloud the name and sound of the animal/object as you introduce them.
- Scan the QR Code to let your little one hear the sound of the respective animal/object.
- Repeat the activity multiple times to reinforce the learning. Make it a part of your child's routine.
- Keep the sessions short to prevent overwhelming your child.
- Celebrate their efforts by praising and clapping for them.
- Remember that learning takes time, especially for young children. Be patient and supportive as your child develops their understanding of wild animals.

Ways to play:

- Play an animal sound using the flashcards. Ask your child to point to or hold up the flashcard that matches the sound.
- Play the animal sound and then mimic the animal's actions. For example: moo like a cow, flap your arms like a chicken. Encourage them to imitate your actions.
